

Construction of upgrades and improvements to North Hudson Sewerage Authority Project “H6/H7 CSO Long Term Control Plan, Phase 2” which covers work on Adams Street between 13th and 15th Streets and along 15th Street to Clinton Street. The \$16,218,031.50 upgrades and improvement cost were financed by the New Jersey Water Bank (NJWB). The NJWB is a State Revolving Fund program jointly administered by the New Jersey Department of Environmental Protection (DEP) and the New Jersey Infrastructure Bank (NJIB) and uses a combination of funds provided by the United States Environmental Protection Agency, the DEP, and the NJIB to provide very low interest loans to borrowers for environmental infrastructure projects.

This project will provide water quality benefits by reducing combined sewer overflows to the Hudson River, and will help reduce flooding for residents and businesses in the northwest portion of Hoboken, NJ.

State Revolving Fund programs around the nation provide states and communities the resources necessary to maintain and improve the infrastructure protecting our valuable water resources nationwide.
