NHSA Sewer Disconnection Application

In order to protect the sewer system from excessive leaks and potential failures, the NHSA is requiring that all sewer service abandonments conform to the following procedure for the disconnection of sewer service. This form provides guidance of disconnection procedures and shall be filled out and submitted to the NHSA for review and acceptance. Upon acceptance of this form by the NHSA, monthly sewer service charges shall discontinue.

Please provide the following information:

1. General Information

a. Applicant/Owner Name: _____

(If LLC, provide owner name and LLC name)

Telephone: _____

Email: _____

Permanent Legal Address _____

b. Location of Activity

Name of Facility/Site: _____

Street Address/Location: _____

Lot and Block No.: _____

2. Disconnection Procedures

Connections with a depth less than 8-feet: The Owner has the option to cut and cap the line at the sewer main in accordance with the Authority standard specifications or to access the connection from the nearest manhole along the Authority sewer and permanently seal the sewer connection from the main.

Connections with a depth greater than 8-feet: The Owner shall access the connection from the nearest manhole along the Authority sewer and permanently seal the sewer connection from the main.

3. Certification

Signature: _____

The NHSA will return correspondence with any comments or acceptance of the termination in service. Submit all Applications to the NHSA, Attn: Sewer Connection Reviews.
